10	FARMERS' KNOWLEDGE LEVEL AND READINESS IN ADOPTION OF DRAGON FRUIT (Hylocereus sp.) IN CHITWAN DISTRICT, NEPAL	57-63

Editorial

Agricultural economics, study of the allocation, distribution, and utilization of the resources used, along with the commodities produced, by farming. Agricultural economics plays a role in the economics of development, for a continuous level of farm surplus is one of the wellsprings of technological and commercial growth. In general, one can say that when a large fraction of a country's population depends on agriculture for its livelihood, average incomes are low. That does not mean that a country is poor because most of its population is engaged in agriculture; it is closer to the truth to say that because a country is poor, most of its people must rely upon agriculture for a living.

Scientific Board

Editorial Team

Editor in Chief

Dr Fridelina Sjahrir
Faculty of Engineering and Life Sciences
Bestari Jaya, Selangor Darul Ehsan, Malaysia

Assoc. Professor. Dr. Saidatulakmal Mohd
Deputy Dean (Research, Postgraduates &
Networking) School of Social Sciences Universiti
Sains Malaysia 11800 Penang, MALAYSIA

Managing Editor

Dr Yazmin Bustami
